Aspiring Data Analyst with a background in Computer Science and Data Analytics. Experienced in data cleaning, exploratory data analysis, dashboard development, and visualization using Python, R, Excel, and Tableau. Skilled at transforming raw data into actionable insights to support data-driven decision-making.

EDUCATION

Queens College, BS in Computer Science (major), Data Analytics (minor) New York, USA | 2026
Extra-Curricular Activities: Coding Club | Tutoring
Courses: Data Structures | Design & Analysis of Algorithms | Database Systems | Operating Systems | Computer Architecture | Probability & Statistics | Linear Algebra

EXPERIENCE

Domino's Pizza, Assistant Manager (IT & Data Analysis | Operations) |(NY, USA) January 2019 – April 2025

- Managed inventory using Excel, ensuring 100% stock availability and utilized sales and shipment data to forecast future inventory orders.
- Analyzed menu items and identified potential improvements which increased sales by 20% during slow season.
- Handled customer phone calls, completed 50+ orders daily, and introduced customers to new deals and items, contributing to a 20% increase in sales.
- Collaborated with manager to implement strategies that improved customer satisfaction by 30%.

Kings Auto Body Shop, Software Developer | Freelance (Roosevelt, NY) May 2022 - Aug 2022

- Designed and developed a comprehensive desktop inventory management system using Java, improving inventory tracking efficiency by 100%.
- Implemented features such as real-time inventory tracking, sales forecasting, and automated restocking, reducing manual workload by 12 hours per week.
- Managed all stages of the software development lifecycle (SDLC), from requirement gathering to deployment, for a project completed on schedule and within budget. Provided ongoing maintenance and updates, ensuring 100% system availability during peak business hours.

SKILLS

Technical Skill: Python, C/C++, Java, SQL, R programming, Git, Tableau, Excel, Office 365, Power Bi, MySQL
Soft Skills: Data Cleaning, Exploratory Data Analysis, Statistics, Data Visualization, Reporting, Data Transformation
Certifications Google Data Analytics Professional Certificate – (2022), Querying and Managing Data, Coursera – (2022) |

PROJECTS

Retail Inventory and Sales Analytics | (Python, Pandas, Excel, Tableau) 2024

- Developed a sales and inventory analytics solution using Python and Excel to clean, transform, and analyze retail transaction data containing thousands of records.
- Utilized Pandas for data preprocessing and exploratory data analysis, identifying sales trends and customer purchasing patterns that supported data-driven inventory decisions.
- Designed interactive Tableau dashboards with KPIs, geographic maps, and trend visualizations, enabling stakeholders to monitor revenue, profit margins, and product performance.
- Automated data preparation tasks and reporting processes, reducing workload by approximately 12 hours per week

Inventory Management Application | (Java, MySQL, Excel) 2025

- Designed and implemented a desktop application in Java to manage product inventory, sales transactions, and customer records.
- Integrated a relational database to support persistent storage and efficient retrieval of inventory data.
- Tested and debugged application functionality, ensuring reliable performance and accurate inventory reporting.

NYC Tree Census Analysis | (Python, Pandas, Matplotlib, Seaborn) 2025

- Analyzed large-scale urban forestry data to examine species distribution and tree health across New York City boroughs.
- Performed data cleaning, aggregation, and statistical analysis on thousands of observations.
- Created visualizations and summary reports to communicate trends and environmental insights.

Store Sales & Profit Margin Analysis | Excel, Tableau 2023

- Built an interactive Tableau KPI dashboard using sparklines, maps, and bar charts to visualize state-level sales and profit margins for a retail superstore, enabling data-driven regional strategy decisions.
